FEDERATION  
OF HOSPITAL  
ENGINEERING

## University Course

**Healthcare Management/Technical  
Management in healthcare facilities**

**Degree: MSc**

**Guide to possible  
STUDENTSHIP**

If your participation in the course is clear,  
register as a **PARCITIPANT** at the  
Danube University Krems!

- You should decide on a fixed participation at least 1 month before the start of the course.
- the tuition fees can be paid semester by semester

If you have financial problems that prevent you from participating, register at the Danube University Krems as an **INTERESTED PARTY:**

- that'll give you time to clarify the financing
- if necessary, you can coordinate the admission with the Danube University Krems in advance
- so do you get information about the start of the next course

# First of all talk with your employer about taking over time and money for your participation in the course!

If you have no or a modest success and your participation depends on financial support, try the next step!

# Review the following studentship-opportunities for continuing education:

- Are there governmental subsidies, or
- country-specific subsidies, or
- subsidies of the employment market administration

If you have no or a modest success try the next step!

If you are a member of a national association of healthcare engineering, submit an application to support your studies / masterthesis:

- at your national association, or
- at the IFHE-EU, or
- at the IFHE

If you have no or a modest success try the next step!

# Contact the project-manager of the ÖVKT, Dipl.-Ing. Dr. Diethard Gstir, MSc:

- the ÖVKT has a budget for studentships for social emergencies
- we try to find a company which is willing to give studentship in a neutral way (this is also a possibility for a national association!)

Clarify with your tax office the possibilities of the tax deductibility for your further education!

This can reduce the possibility of spending effective costs!
